

Record Performance by DS, Mumbai: Drilling 1215 m in Single Day

On 13 November 2017, Rig Dynamic Vision deployed for drilling development well VSEC-10H has drilled 1215m in single day, this is a new record performance for maximum meterage drilled in single day in 12-1/4" section.

Rig was skidded to well VSEC-10H on 10 November 2017. The 12-1/4" section was drilled from 1380m to 2595m with Single PDC bit run and RSS. The lithology encountered was Mahim, Alibag and Heera formations which mainly contain shale. Synthetic Oil Based Mud used in this section played an important role in achieving this feat. It is worth mentioning that in-spite of Hole inclination in this section varying from 58.8 to 66 Degree, the Average ROP achieved was 91.9 m/hr.

Well Schematic # VSEC-10H

This milestone has been achieved by perfect coordination between Rig crew of Dynamic Vision, ONGC Directional drilling team, Mud Services and other associated Service providers under leadership of Drilling operations team of B&S Asset. Online monitoring of drilling parameters through SCADA played a very important role in perfect and timely intervention at every stage for flawless execution.

This outstanding *Team effort* was led from the front by GM (D)-LMDS, S.K. Srivastava. The overall execution and monitoring was done under the supervision of Operations Manager, DGM (D), Ajay Kumar Sharma, DGM (D)-Rig Manager, Mahipal Singh, DGM (Chem.), S. K. Trivedi and DGM (D), R S Singh.
